

September 19, 2016

Dear Madam or Sir,

I recommend Platon Korzh to you as an excellent Full Stack Software Developer. My company is unfortunately closing down due to changing market conditions and I will therefore regrettably no longer be able to offer Platon any continued employment.

During his time with Filmyr, Platon functioned as the Lead Software Engineer and the architect behind our technology. His in-depth knowledge about cutting edge software technology allowed him to build a robust, lasting, and scalable solution that could deal with millions of users. He cared about code quality while also iterating quickly and put effort into improving our tech stack, tools, and processes. He also worked closely with the company founders to help set priorities and focus on the right things.

Platon is a reliable asset for any company who chooses to add him to their team. I encourage you to hire him and benefit from his talents before another lucky company will.

If you need further insight into why Platon should be your next team member, please feel free to call me at +46 735090484 or email me at eberg@filmyr.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Emil Bergdahl".

Emil Bergdahl
CEO, Filmyr
